

Welcome to East Main Vision Clinic!

We want to thank you for choosing us for your eye care needs. Our goal and mission is to provide unsurpassed preventive and medical eye care, with leading edge equipment in a warm, family environment. Our office is handicap accessible, has ample parking, features state of the art equipment, and stylish frame lines.

To make your visit more efficient, we have included a health history form. Please fill this out before your visit, and bring this, with a list of any medications and/or supplements you may be taking at this time. Also, please remember to bring all current eyewear, including contacts, with you to your appointment.

If you are interested in or currently wear contact lenses, please note there is an additional fee for a contact lens evaluation of \$55. This fee may or may not be covered by your insurance. The additional fee allows Dr. Day to assess any visual needs pertaining to your contacts, the general fit of the contact on your eye, and eye health pertaining to contact lens wear.

At any time, please contact our office if you have any questions. We will be verifying all your insurance benefits before your appointment and are so very excited to meet you at your upcoming appointment. Please let us know if we can do anything to make your experience in our office more enjoyable.

Warm regards,

Dr. Joseph Day and the staff at East Main Vision Clinic
